

ADAPTADOR F.O. LC DUPLEX MULTIMODO

Ref. ADLCDPXMM

The LC adapters from OFS feature a self-adjusting mechanism designed to accommodate panels of thickness between 1.55 to 1.75 mm (0.50 to 0.067 inches).

The LC duplex adapter occupies approximately the same space as an SC simplex adapter, doubling the density capacity of the equipment. Our LC Adapter is designed to work together with the complete LC product family to offer an optimal, high-density solution for your network.

The adapter has a square profile and can be rotated to any of four positions in the panel. It is available in single-mode, multimode, simplex and duplex options. LC adapters can mount in panels designed to fit the 5-inch, 7-inch, and 9-inch LGX shelves. Three versions are available.

One option is a low profile LC single-mode duplex adapter that fits the opening of an SC simplex adapter. It fits panels of thickness between 1.55 to 1.75 mm (0.50 to 0.067 inches).

The duplex angled mount LC adapter latches into a rectangular panel opening 17.83 mm high (max 17.98 mm) by 17.23 mm wide (max 13.39 mm) wide.

Our LC Adapter products include:

- Single-mode, simplex and duplex
- Multimode, simplex and duplex
- LC adapter in SC footpring
